IF AUSTRALIA… / Long-form — Production Script (FINAL)

Is Australia Full? Is Pauline Hanson Shaping Albanese's Immigration Debate?

Format: long-form, 16:9, 1920×1080, 30 fps **Runtime:** about 13½–14 minutes (≈1,800 narrated words at 120–155 wpm, plus about 30 seconds of pauses and a 15-second end screen) **Mid-roll ad breaks:** 3 (after S15, S27 and S36). Each one lands on a cliffhanger. **Voice:** Grok TTS, voice **Atlas** (single narrator, the same as the rest of the channel). Delivery direction is in every segment. The paste-ready text is in Part 6. **Media budget: $0.** Every clip, photo, sound and track comes from a free source (Part 8). There is no news-network or agency footage. **Continuity:** this is the fourth film in the series, after *The Pauline Hanson Story*, *From Council Flat to The Lodge* and *Can Albanese Stop Pauline Hanson?*. It reuses their visual language, the red thread and several of their assets (marked **REUSE**). **Research cut-off:** 15 October 2026. Re-check polls, the Albanese speech wording and the Joyce quote on publish day (Part 10).

This single file contains everything needed to produce the video:

- packaging, and the legal, balance and safety rules;
- the visual system and the voice pacing;
- the full shot-by-shot script, with narration, footage, animated images, B-roll and word-synced animation cues;
- the Grok voiceover text and the evidence wording;
- the asset collection list, the on-screen numbers, the publish-day checks and the disclaimer.

PART 1: Packaging

Title (final): Is Australia Full? Is Pauline Hanson Shaping Albanese's Immigration Debate?

Thumbnail (final text): IS ALBANESE COPYING HANSON?

- **Left:** the freely licensed Albanese photo (DFAT, CC BY 4.0, **REUSE**). Pick the most serious or pensive expression available, with a hand to the chin if a free photo exists. Crop and grade only; never alter the face.
- **Right:** the CC0 Hanson portrait (**REUSE**, "Pauline Hanson 2016 01.jpg"), angled toward the centre.
- **Centre:** a cracked dark map of Australia with a glowing red **"800 / DAY"** counter. Four pinned polaroids are linked by red string: an airport arrivals board, a "SOLD" auction sign, cranes over apartments, and a graduation cap.
- **Bottom:** Parliament House at a red-orange sunset (free stock, **REUSE**).
- **Text:** two lines, "IS ALBANESE" in white and "COPYING HANSON?" in yellow #FFD60A, heavy condensed sans, red #C0161E outline and drop shadow.
- **Never:** no crowds or queues of people, no AI-generated or altered faces, no party logos.

Chapters (adjust to the final render) 0:00 The question 1:10 Chapter 1: The numbers 3:05 Chapter 2: Hanson's thirty-year argument 4:25 Chapter 3: The rise 5:45 Chapter 4: The pattern 8:05 Chapter 5: The case against "copying" 9:50 Chapter 6: Who pays? 11:25 Chapter 7: The twist 12:55 Is Albanese copying Hanson?

Description (top): the disclaimer (Part 11), then chapters, then sources (Part 7), then media credits (fill in from Part 8 as items are collected), then: "Some background scenes are AI-generated reconstructions. No real person has been AI-generated or altered."

Pinned comment: "You've seen the timeline. Is Albanese copying Hanson, or taking her issue away from her? And is Australia full? 👇"

PART 2: Rules (apply to every frame)

Evidence, balance and law

1. **Every factual claim appears on screen with its source and date** as it's spoken (Part 7 has the exact wording).
2. **The four labels.** Every evidence card and key line carries one corner label:
   - **FACT** (white): verified events, official statistics, results and published polls.
   - **CLAIM** (orange outline): what a person or party says, including every party's policy promise and every quote about a rival.
   - **ANALYSIS** (blue): an attributed interpretation, or one of our own calculations

(always marked “our calculation”).

- **SPECULATION** (grey, dashed): what could be happening. Used only in Chapter 7 and the closing.

3. **“Copying” is always a question, never a statement.** No card, title or caption says that Albanese copied Hanson. The pattern board shows dates and time gaps only. The **PATTERN ≠ PROOF** stamp appears in S27, and the **CORRELATION ≠ CAUSATION** stamp appears in S38.
4. **Equal weight.** Chapter 5 (Labor’s case) gets the same visual production value as Chapter 4 (the pattern). Every party’s plan is shown with the same bar style.
5. **Every poll card shows** the pollster, fieldwork dates, the sample size where known, and the line “One poll is a snapshot, not a verdict.”
6. **No motives are invented.** Where a motive isn’t documented, the script shows the action and attributes any interpretation.
7. **Exact quotes only inside quotation marks**, always with speaker, source and date. Everything else is paraphrased.
8. **ParlView footage** is used in fair, in-context excerpts (never cut mid-sentence), credited “Parliament of Australia”, under Parliament’s broadcast conditions. Hold written confirmation from ParlView before publishing (**REUSE** the confirmation from the earlier films if it covers the channel).
9. A final review of the cut by an Australian media lawyer before publishing.

People and respect (migration-specific)

10. **No AI-generated, drawn, animated or altered likeness of any real person.** Real people appear only in real photos and ParlView footage (crop, scale, grade and position only).
11. **Migration is never shown as a threat.** There are no “flood” or “wave” visuals, no arrows of people invading the map, and no crowds or queues of migrants. The 800/DAY counter uses neutral white points of light, never people.
12. **No icons, illustrations, clothing or symbols representing any ethnic, national or religious group.** Stock with visible faces in public places is blurred or avoided.
13. **Show migration through objects and places:** arrivals boards, suitcases, passports (generic, no country), cranes, homes, campuses, cafés, orchards, hospitals.
14. **Quiet moments** with slow, minimal motion and no comic effects: S12 (the 1996 quote),

S14 (the 2016 footage) and S43 (the thirty-year line).

15. A small **"Dramatised reconstruction"** label the first time AI B-roll appears (S01).

PART 3: The visual system

3.1 Five layers

Layer	Job	Share of runtime
📽️ **Real event footage** (ParlView)	Proof you can watch: the 1996 and 2016 speeches, Question Time on migration	about 10%
📸 **Animated free images**	People and places, always moving	about 25%
🧾 **Evidence cards**	Poll results, ABS figures, quotes and policy lines, highlighted as spoken	about 20%
⏳ **The pattern board, data and maps**	The backbone: dated nodes, time gaps, poll lines and migration charts	about 30%
🎬 **B-roll** (free stock or AI)	Atmosphere where nothing real exists	about 15%

The **animation layer** runs on top of every layer: motion graphics that react to the narration word by word (the cue tables in Part 5).

3.2 The golden rule

Something on screen reacts to the voice every 1–2 seconds. No image ever sits still. Every photo enters with a move from 3.5 and keeps drifting until it leaves. The only exceptions are the quiet moments (S12, S14, S43).

3.3 The red thread (REUSE, series signature)

- The red string (#C0161E) **starts in S01** on the June 2026 poll card.
- Every new event: **the thread pulls the next card, photo or clip in** from off-screen and ties a small knot on it.
- When one event sits close in time to another, the thread **stretches between them and**

a gap label appears (”+0 DAYS”, “+3 DAYS”).

- **In S11, the thread yanks the camera back to 1996**, and in S43 it reaches from 1996 all the way to 2026.

3.4 The pattern board (new, the backbone of this film)

- A horizontal timeline from **Dec 2023 to Oct 2026** on dark paper (#121212 with a subtle paper texture). It’s built in Chapter 3, completed in Chapter 4 and extended left in Chapter 5.
- **Three tracks**, one above another:
  - **ONE NATION** (orange #F28C28, top): polls and policy moves.
  - **LABOR GOVERNMENT** (red #D62828, middle): announcements and decisions.
  - **COALITION** (blue #1F4E9E, bottom): policy moves.
- **Nodes:** small paper cards with the date in small caps, a three-to-six-word title, a thumbnail and a corner label.
- **Gap labels:** when the thread links an orange node to a later red or blue node, a white pill shows the time gap (”+3 DAYS”). Gap labels show time only, never an arrow implying cause.
- **The grey track (Chapter 5):** in S27 the board slides right and a grey section (2023–2024) is revealed on the left, showing that Labor’s cuts began before One Nation’s rise.
- **Camera:** dolly left to right through the board, diving into nodes for evidence cards and pulling back out.

3.5 Image animation moves (REUSE, used in every 📸 image sequence)

Code	Move	How it looks	Sound
DROP	Photo drop	A white-bordered photo falls onto the board with a slight tilt and shadow	Camera-shutter click
STACK	Polaroid stack	2–4 photos land one on top of another, each slightly rotated	A click per photo
PAN	Ken Burns + parallax	Slow push or pan with the foreground separated for 2.5D depth	Low whoosh
		A hand-drawn red circle or underline draws	

CIRCLE	Marker circle	around a detail	Marker squeak
CALLOUT	Label pop	A label or arrow pops out pointing to something	Pop
ZOOM	Document zoom	The camera dives into a document to one line, and a highlighter swipes across it	Page turn + swipe
PIN	Pin to board	The photo shrinks and snaps onto its node or map location	Thunk
SPLIT	Side by side	Two photos slide in from opposite sides and lock together	Whoosh + click
WALL	Photo wall	6–12 images tile in rapidly as a grid, then one zooms forward	Rapid clicks
TORN	Torn-paper reveal	A photo is revealed behind ripping paper	Paper rip

Each image is on screen for 1.5–3 seconds and is always moving. Every real photo has a small caption (name, role, year) and a credit in the corner.

3.6 Animation types (used in every cue table)

- Kinetic type (spoken words appear as they're said).
- Number rolls (odometer or slot machine).
- Bar races and poll lines that cross.
- Map highlights.
- Stamps with a 4 px screen shake.
- Split-flap date boards.
- Annotations (circles, arrows, labels).
- Icon actions: a ticket slides to the back of a queue, a padlock rattles and breaks, a receipt prints.
- Thread transitions.

3.7 Recurring motifs

- **The 800/DAY counter.** It's introduced in S07, then sits in the top-right corner (small,

60% opacity) from S07 to S44. It shows “+1 every 1m 48s” (our calculation: 86,400 seconds ÷ 800). It ticks +1 every 108 seconds of runtime with a soft click and shows “SINCE YOU STARTED WATCHING: +N”. It’s hidden during the quiet moments and the mid-roll beats, and pays off in S42.

- **The scoreboard (REUSE):** three party bars (orange, red, blue) used for every primary-vote poll.
- **The padlocked chart:** a blurred poll chart with a padlock and a “LATER” tag. It appears in S05 and rattles in S36, and the padlock breaks in S37. It’s the open loop that drives retention.
- **“IS AUSTRALIA FULL?”** title card: S05, S09 and S42.

3.8 Reusable elements

Red thread with knot · split-flap date board · stamps (FIRST, POSTPONED, TARGET, RECORD, PATTERN ≠ PROOF, CORRELATION ≠ CAUSATION) · evidence card · quote card · number roll · scoreboard · poll lines · map highlight (Australia, SA, Farrer, **REUSE**) · corner tag · lower-third · padlock chart · 800/DAY counter.

3.9 Design tokens (REUSE)

- **Colours:** background #121212 · paper #F4EFE6 · One Nation orange #F28C28 · Labor red #D62828 · Coalition blue #1F4E9E · Greens green #2E9E4F · gold #D4A017 · thread red #C0161E · neutral grey #8A8A8A · counter-dot white #FFFFFF at 80%.
- **Fonts (free, OFL):** Inter for kinetic type, labels and numbers; Source Serif 4 for quotes, headlines and evidence cards.
- **Evidence cards:** an off-white paper card on a dark background, with the outlet and date top-left in small caps, a serif headline, a yellow highlighter swipe on the key phrase in sync with the narration, and a small “SOURCE” tab. Recreated in this design, never screenshots of news pages.
- **Photo grade:** slight warmth, light grain and a soft vignette on every photo and stock clip.
- **Motion:** ease-out entrances of 200–350 ms.
- **Icons:** simple line icons from free sets (Google Material Symbols, OpenMoji): plane, house, crane, graduation cap, coffee cup, calendar, padlock, ticket, receipt.

3.10 AI B-roll

Style anchor, added to every AI prompt: *Cinematic documentary B-roll, 16:9, natural*

colour, gentle film grain, shallow depth of field, slow camera movement, realistic, no text, no logos, no recognisable real people, faces not visible. **Never generate:** real people, crowds of travellers or migrants, religious or national dress, flags as the main subject, or party logos.

3.11 Voice pacing and mix

Delivery modes (named in every segment):

Mode	Pace	Feel
HOOK	150–155 wpm	Urgent, clipped, short sentences land hard
STORY	145 wpm	Warm, documentary narrator
EVIDENCE	135–140 wpm	Precise; numbers get a tiny lift and a micro-pause before them
QUESTION	125–130 wpm	Curious, open; the pitch rises gently at the end
WEIGHT	115–125 wpm	Slow and serious; quotes read neutrally, never acted

Pause markers: ⏸️ followed by seconds. Hold the visual and let the music breathe; no narration.

Natural-pacing rules:

- Keep every segment within ±6% of its target pace. If Grok reads faster, add space between sentences rather than time-stretching the voice.
- Leave 0.25–0.4 s between sentences and 0.6 s between paragraphs inside a segment.
- Use room tone in gaps, never digital silence.
- Never cut a breath before a number or a quote.

Mix: narration –14 LUFS integrated, true peak –1 dBTP. Sound effects sit about 12 dB under the narration. Music sits about 20 dB under the narration and ducks under speech with a 150 ms attack and 600 ms release.

Music map:

Section	Cue	Feel

Opening, Chapter 4	MUS_01	Tense pulse
Chapter 1, Chapter 5	MUS_02	Neutral investigative
Chapter 2	MUS_03	Archival, reflective
Chapter 3	MUS_04	Building momentum
Chapter 6	MUS_05	Sober, slightly melancholic
Chapter 7, Closing	MUS_06	Tense to resolve

Mid-rolls: a clean 0.5-second beat of room tone after S15, S27 and S36, with music fully out.

Captions: burned-in subtitles off. Upload an accurate caption file (two lines, max 42 characters each).

PART 4: Footage key

🟢 = free ParlView or public-record footage (used under Parliament's conditions) · **FREE SWAP** = no free footage exists, so the slot uses free photos, animation, free stock or AI B-roll instead · 🟡 = free only with written permission (use only if granted).

National Press Club footage, TV news and press-conference footage are **never** used. Those moments are always a FREE SWAP: a real free photo + quote card + B-roll.

PART 5: Shot-by-shot script

OPENING: The question

S01

> On a Monday in June 2026, a Newspoll landed in Canberra like a bomb. Pauline Hanson's One Nation was on 31% of the primary vote. Anthony Albanese's Labor government was on 30%.

🎙️ **HOOK**, 150 wpm.

- ⏸️ 0.4 s after "like a bomb".
- The two numbers are clipped and firm.

- The final “30%” drops slightly in pitch.

Visual track (in play order)

1. 🎬 `BR_AI_canberra_dawn_fog` (2 s): a slow push through fog toward a government building silhouette. Show the “Dramatised reconstruction” label (bottom-left, 2 s).
2. 🧾 Poll card E01 slams onto the dark board: “NEWSPOLL · JUNE 2026”. **FACT**
3. ⏳ Scoreboard: the orange One Nation bar races to 31 and the red Labor bar to 30. Orange edges past.
4. 📸 SPLIT: Albanese (left) and Hanson (right) slide in behind the bars, in the thumbnail composition.

📸 **Image sequence**

- `IMG_albanese_dfat` SPLIT from the left, then a slow PAN in.
- `IMG_hanson_cc0` SPLIT from the right, then a slow PAN in.

⚡ **Animation cues** (each starts on the first word of its trigger)

VO cue	Animation	Sound
“a Newspoll landed”	The poll card drops, 4 px screen shake, dust particles	Bass impact
“like a bomb”	Fog clears instantly to the dark board	Air whoosh out
“31%”	The orange bar rolls 0 → 31	Tick roll
“30%”	The red bar rolls to 30 and stops just short	Tick roll, soft stop
“Labor government”	The Albanese photo locks in	Click

S02

> That same day, the Prime Minister stood in front of reporters and made a promise. Net overseas migration would come down to 225,000. “We think that is the right number,” he said. Coincidence? Maybe.

🎙️ **STORY → QUESTION**, 145 then 120 wpm.

- Read the quote neutrally, without acting it.
- ⏸️ 0.6 s before “Coincidence?”.
- “Maybe.” comes after a 0.3 s beat, dry and understated.

Visual track

1. ⏳ The red thread pulls from the poll card to a new node: “SAME DAY”. **FACT**
2. 📸 Albanese photo PAN, lower-third: “Anthony Albanese · Prime Minister”.
3. ⏳ A gold number roll: “225,000 net overseas migration”.
4. 🧾 Quote card E02: “We think that is the right number.” Anthony Albanese, Canberra, June 2026. **FACT** (his words)
5. ⏳ A huge red marker “?” draws across both nodes.

⚡ **Animation cues**

VO cue	Animation	Sound
“That same day”	The thread snaps tight between the two nodes and ties a knot	Thread snap
“225,000”	Slot-machine roll in gold	Slot clicks + ding
“the right number”	Highlighter swipe across the quote	Swipe
“Coincidence?”	The red “?” draws over both nodes	Marker squeak
“Maybe.”	The “?” flickers once	Soft glitch

S03

> Three months later, Pauline Hanson announced a plan to cut 750,000 temporary visas. Three days after that, Labor unveiled its own migration crackdown.

🎙️ **HOOK**, 155 wpm. Stress “Three days”.

Visual track

1. ⏳ Pattern board preview: an orange node “14 SEP 2026 · One Nation: 750,000 visas cut” (**CLAIM**: policy) and a red node “17 SEP 2026 · Labor crackdown” (**FACT**).

2. 📸 DROP the Hanson photo onto the orange node and the Burke photo onto the red node.
3. ⏳ The gap label “+3 DAYS” pulses between them.

⚡ **Animation cues**

VO cue	Animation	Sound
“Three months later”	The split-flap date board rolls JUN → SEP	Split-flap rattle
“750,000”	Number roll, with a stack of visa icons collapsing	Roll + paper flutter
“Three days after that”	The calendar flips 14 → 15 → 16 → 17	Three flips
“crackdown”	The red node stamps down; “+3 DAYS” pops	Stamp + pop

---

S04

> So is Anthony Albanese copying Pauline Hanson? Or is something bigger happening in Australia, something both of them are reacting to?

🎙️ **QUESTION**, 130 wpm. ⏸️ 0.5 s after the first question.

Visual track

1. ⏳ Kinetic title in the thumbnail typography: “IS ALBANESE COPYING HANSON?”
2. ⏳ The camera pulls back. Both photos shrink as a huge faint map of Australia fades in behind them, with a “?” at the centre.
3. 🎬 `BR_STOCK_sydney_street_timelapse` (2 s): people as motion-blur streaks only.

⚡ **Animation cues**

VO cue	Animation	Sound
“copying”	The word types in yellow, heavy, with a red outline	Type thuds
“something bigger”	The map scales up behind everything	Low swell
“both of them are	Two thin threads run from each photo to	Thread tension

reacting to"	the "?"	creak

S05

> We're not going to tell you what to think. We're going to lay out the dates, the numbers and the quotes, in order. And at the end, there's one pattern in the polls that almost nobody is talking about. But first, the question everyone is fighting over. Is Australia actually full?

🎙️ **STORY**, 145 wpm, then **QUESTION** at 115 wpm on the last line. ⏸️ 1.0 s after "full?".

Visual track

1. ⏳ Three icons lock into a row as they're named: calendar "DATES", number "NUMBERS", quote marks "QUOTES".
2. 🧾 Disclaimer card (short version, 3 s, lower third): "Independent documentary · Not affiliated with any party · Every source on screen and in the description."
3. ⏳ The padlocked chart appears, blurred, with a padlock and a "LATER" tag.
4. ⏳ Title card: "IS AUSTRALIA FULL?" over a map outline. White points of light begin to fill the cities. Hold 1 s.

⚡ **Animation cues**

VO cue	Animation	Sound
"the dates" / "the numbers" / "the quotes"	Each icon clicks into place	Three clicks
"in order"	The icons slide into a line like a timeline	Slide
"one pattern in the polls"	The padlocked chart slides up	Chain rattle
"almost nobody is talking about"	The padlock glints	Shimmer
"Is Australia actually full?"	The title types in letter by letter and the map points glow	Low drone + bass hit

---

CHAPTER 1: The numbers

S06

> Australia's population now stands at about 27.9 million people. In the twelve months to March 2026, the country grew by 392,700 people. Around three in every four of them came from overseas.

🎙️ **EVIDENCE**, 140 wpm. Micro-pause before each number.

Visual track

1. 🎬 `BR_STOCK_melbourne_aerial_dusk` (2 s) under a population odometer.
2. 🧾 ABS card E03. **FACT**
3. ⏳ A stacked bar for "Where the growth came from": net overseas migration 74% (gold) and births minus deaths 26% (grey).

⚡ **Animation cues**

VO cue	Animation	Sound
"27.9 million"	The odometer rolls to 27,921,200	Odometer whirr
"392,700"	"+392,700" stamps in green	Stamp
"three in every four"	The gold section fills three-quarters of the bar; "74%" pops	Fill swoosh + pop

---

S07

> Net overseas migration, the number of people arriving to live in Australia minus the number leaving, was 292,100 over that year. That's roughly 800 people every single day.

🎙️ **EVIDENCE**, 135 wpm. "Every single day" is slower and weighted.

Visual track

1. ⏳ An explainer equation: a plane-arriving icon (ARRIVALS) – a plane-departing icon (DEPARTURES) = **NET OVERSEAS MIGRATION**.
2. 🧾 ABS card E04: "292,100 · year to 31 March 2026". **FACT**
3. 🎬 `BR_STOCK_airport_arrivals_board` (2 s).
4. ⏳ **The 800/DAY counter launches** at full size at the centre, then shrinks to the top-

right corner with the sub-label “+1 every 1m 48s (our calculation)”. **ANALYSIS**

⚡ **Animation cues**

VO cue	Animation	Sound
“arriving”	The arrivals plane slides in	Jet pass (soft)
“minus the number leaving”	The departures plane slides out and a minus sign appears	Whoosh
“292,100”	Number roll	Roll
“800 people”	The counter slams to the centre: “800 / DAY”	Bass hit
“every single day”	The counter flies to the corner and its first tick fires	Soft click

---

S08

> And that’s the low number. In 2023, after the borders reopened from COVID, net migration passed half a million, the highest on record.

🎙️ **STORY**, 145 wpm. Lift on “the highest on record”.

Visual track

1. ⏳ A line chart of net overseas migration:
   - pre-COVID average: “just over 200,000”;
   - 2020–21 band: “borders closed”;
   - 2023: 530,620 (calendar year);
   - 2025: 301,000;
   - year to March 2026: 292,100.
2. ⏳ The 2023 point gets a “RECORD” stamp. **FACT**
3. 🎬 `BR_STOCK_plane_landing_sydney` (2 s).

⚡ **Animation cues**

VO cue		Sound

	Animation	
“the low number”	The current point (292,100) circles in red	Marker squeak
“borders reopened”	A grey “borders closed” band lifts like a gate	Gate creak (soft)
“half a million”	The line rockets up to 530,620	Rising whoosh
“highest on record”	“RECORD” stamp	Stamp + shake

S09

> Now, by land, Australia is one of the emptiest countries on Earth, with about three people for every square kilometre. So when people ask “Is Australia full?”, they’re rarely talking about land. They’re talking about homes. Rents. Hospital waiting lists. Traffic on the M1.

🎙️ **STORY**, 140 wpm. The four short items are punchy, with 0.2 s between each.

Visual track

1. 🎬 `BR_AI_outback_aerial_empty` (2.5 s), with the kinetic label “≈3.6 people per km²” (27.9 m ÷ 7.69 m km², our calculation). **ANALYSIS**
2. ⏳ “IS AUSTRALIA FULL?” flashes back for 1 s.
3. 📸 STACK, one image per word:
   - `BR_STOCK_house_sold_sign`
   - `BR_STOCK_rental_inspection_keys`
   - `BR_STOCK_hospital_corridor_empty`
   - `BR_STOCK_motorway_traffic_aus`

⚡ **Animation cues**

VO cue	Animation	Sound
“emptiest countries on Earth”	The outback camera rises higher, endless horizon	Wind
“three people for every square kilometre”	A 1 km grid square draws with three small dots	Three soft pings
“Homes.” / “Rents.” / “Hospital waiting	Each word types as its photo	Click on

lists.” / “Traffic on the M1.”	drops	each

S10

> The Coalition’s Andrew Bragg points out that Australia completes only around 170,000 new homes a year, far fewer than the number of people arriving. Supporters of migration answer that migrants build many of those homes, staff the hospitals and pay the taxes that fund them.

🎙️ **EVIDENCE**, 140 wpm. Even-handed tone; the two halves get identical weight.

Visual track

1. ⏳ A split screen headed “SAME NUMBERS · TWO READINGS”.
2. Left: 📸 DROP `IMG_bragg`. 🧾 Card E05 “≈170,000 home completions a year vs net overseas migration”. **CLAIM** (Andrew Bragg, Shadow Housing Minister, Sept 2026)
3. Right: 📸 STACK `BR_STOCK_construction_worker_scaffold` (face not visible) and `BR_STOCK_nurse_corridor_back`. 🧾 Card E06 “Migrants build homes, staff hospitals, pay taxes”. **CLAIM** (supporters of migration, including the Prime Minister, Oct 2026)

⚡ **Animation cues**

VO cue	Animation	Sound
“170,000 new homes”	A house icon counter rolls to 170,000	Roll
“far fewer”	The arrivals bar overtakes the homes bar	Whoosh
“migrants build”	A crane icon lifts a house into the homes bar	Mechanical whirr
“staff the hospitals” / “pay the taxes”	Hospital and coin icons pop in	Pop, pop

---

S11

> Both sides are using the same numbers. They just read them differently. And for thirty years, one politician has been reading them the same way.

🎙️ **STORY → WEIGHT**, 140 then 125 wpm. ⏸️ 0.5 s before “And for thirty years”.

Visual track

1. ⏳ Both columns collapse into one number, “292,100”, which splits into two colours (blue and gold).
2. ⏳ The red thread yanks the camera left. The split-flap board rolls 2026 → 1996.
3. 📸 TORN: the CC0 Hanson portrait is revealed in sepia.

⚡ **Animation cues**

VO cue	Animation	Sound
“same numbers”	Both columns merge into one figure	Merge whoosh
“read them differently”	The figure splits into two colours	Glass chime
“thirty years”	The split-flap board rolls back 30 years	Long rattle
“the same way”	The thread knots on the sepia portrait	Thread snap

---

CHAPTER 2: Hanson’s thirty-year argument

S12 *(quiet moment)*

> In September 1996, a newly elected MP from Ipswich named Pauline Hanson gave her first speech to Parliament. She warned that Australia was in danger of being “swamped by Asians.”

🎙️ **WEIGHT**, 120 wpm.

- ⏸️ 0.8 s before the quote.
- Read the quote slowly and neutrally.
- ⏸️ 1.0 s after it.

Visual track

1. 📹 `FT01_hanson_maiden_1996` 🟢 (ParlView, **REUSE**), 6–8 s, played plainly. Lower-third: “Pauline Hanson · first speech · House of Representatives · 10 Sep 1996 · Parliament of Australia”.
2. 🧾 Quote card E07 (serif, static, no flourish): “…in danger of being swamped by Asians.” Hansard, 10 Sep 1996. **FACT** (her words)

⚡ **Animation cues**: none. Quiet moment. Music drops to a single sustained note under the quote. The 800/DAY counter is hidden.

S13

> The speech made her famous, and in much of the country, it made her untouchable. Both major parties preferenced against her. Commentators called her views racist. For two decades, being seen near Hanson was treated as political poison.

🎙️ **STORY**, 140 wpm.

Visual track

1. 🎬 `BR_AI_1990s_lounge_tv_glow` (2 s): an empty 1990s lounge room lit by a TV glow, no people.
2. ⏳ A 1998 node: “Major parties put One Nation last on preferences”. **FACT** (1998 federal election)
3. 🧾 Card: “Widely criticised as racist.” **ANALYSIS** (commentators, 1996–98)
4. ⏳ A “keep-out” ring draws around the Hanson portrait, and other node cards slide away from it.

⚡ **Animation cues**

VO cue	Animation	Sound
“famous”	Camera-flash bursts around the portrait	Flash pops
“preferenced against her”	Two ballot-paper icons put the orange box last	Paper slide
“untouchable” / “political poison”	Neighbouring cards slide away and the ring pulses	Low hum

---

S14 *(quiet moment for the footage)*

> But she never stopped talking about migration. In 2016, she returned to the Senate warning about Muslims. In 2018, she called for migration to be capped at 75,000 a year. By 2025, her target was 130,000.

🎙️ **STORY**, 140 wpm. Neutral on the 2016 line.

Visual track

1. 🎥 `FT02_hanson_senate_2016` 🟢 (ParlView, **REUSE**), 4 s, played plainly with a date lower-third. No animation over the footage.
2. ⏳ A policy staircase in orange: “2018 · cap 75,000” → “2025 · 130,000”. **CLAIM** (her policy)
3. ⏳ The thread knots on each step.

⚡ **Animation cues** (after the footage)

VO cue	Animation	Sound
“75,000”	The first step builds with a number roll	Roll
“130,000”	The second step builds	Roll

S15

> Then came the May 2025 federal election. The Coalition ran on cutting migration, and lost in a landslide. Labor won 94 seats. One Nation won about 6% of the vote, and not one seat in the House of Representatives. On that night, Pauline Hanson looked like a story from the past. What happened next surprised almost everyone in Canberra.

🎙️ **STORY → WEIGHT**, 145 then 120 wpm. ⏸️ 0.6 s before “What happened next”. The last line is low and slow (cliffhanger).

Visual track

1. 🎬 `BR_AI_election_night_empty_hall` (2 s): an empty function hall with deflated balloons and no logos.
2. 📸 DROP `IMG_dutton` with the tag “Coalition 2025: cut migration”. **FACT**
3. ⏳ A map of Australia: seats light red, and the counter rolls to “94”. **FACT**
4. ⏳ A One Nation tile: “6.4% · 0 House seats” turns grey. **FACT**
5. ⏳ The Hanson node fades to sepia… then a single orange pulse travels down the thread.

⚡ **Animation cues**

VO cue	Animation	Sound
“lost in a landslide”	Blue tiles collapse off the map	Rumble
“94 seats”	The red counter rolls to 94	Roll + hit
“not one seat”	A “0” stamps on the One Nation tile	Hollow stamp
“a story from the past”	The portrait fades to sepia	Tape-stop
“surprised almost everyone”	An orange pulse runs down the thread	Heartbeat thump

▶ **MID-ROLL AD BREAK 1** (0.5 s of room tone, music out)

CHAPTER 3: The rise

S16

> By November 2025, just six months after that election, polls showed something new. For the first time, more voters named One Nation as the party best able to handle immigration than named Labor or the Coalition.

🎙️ **STORY**, 145 wpm. Lift on “For the first time”.

Visual track

1. ⏳ **The pattern board is born.** A timeline draws from NOV 2025 to OCT 2026, with only the orange ONE NATION track so far.
2. ⏳ First node: “NOV 2025 · One Nation first rated best on immigration · 27%”. **FACT** (poll, as reported by the AFR)
3. ⏳ An issue bar chart titled “Best party to handle immigration”. The orange bar takes the lead.

⚡ **Animation cues**

VO cue	Animation	Sound
“something new”	The timeline line draws left to right	Pen scratch
“For the first time”	A “FIRST” stamp lands on the node	Stamp
“best able to handle immigration”	The orange bar overtakes the red and blue bars	Race whoosh

S17

> In January 2026, One Nation drew level with the Coalition at 23% in a national poll. In March, One Nation won almost 23% of the vote at the South Australian state election, and took four lower-house seats.

🎙️ **EVIDENCE**, 140 wpm.

Visual track

1. ⏳ Node “JAN 2026”: scoreboard bars for One Nation 23 and Coalition 23 meet exactly. Poll card E08 (DemosAU for Capital Brief). **FACT**
2. ⏳ Node “MAR 2026”: the SA map (**REUSE**). Four seats light orange. “22.9% · 4 seats”. **FACT**
3. 🎬 `BR_STOCK_adelaide_skyline` (2 s).

⚡ **Animation cues**

VO cue	Animation	Sound
“drew level”	The two bars meet and clink	Glass clink
“almost 23%”	Number roll to 22.9	Roll
“four lower-house seats”	Four seats light one by one	Four pings

---

S18

> In May, One Nation’s David Farley won the Farrer by-election, becoming the first One Nation candidate ever elected to the House of Representatives. And in June came that Newspoll. One Nation 31. Labor 30.

🎙️ **EVIDENCE → HOOK**, 140 then 150 wpm. “One Nation 31. Labor 30.” are short hits, with 0.3 s between them.

Visual track

1. ⏳ Node “9 MAY 2026”: the Farrer map highlight (**REUSE**) with a “FIRST” stamp. **FACT**
2. 📽️ `FT03_farley_first_speech` 🟢 (ParlView, **REUSE**), 3 s, played plainly. If unavailable, use a FREE SWAP: the Farrer map plus `IMG_farley` if a free photo exists, otherwise a name card.

3. ⏳ Node “JUN 2026”: the opening poll card (E01) flies back in. The red thread loops back to S01’s knot.

⚡ **Animation cues**

VO cue	Animation	Sound
“first One Nation candidate ever”	“FIRST” stamp	Stamp + shake
“that Newspoll”	The S01 poll card flies back in	Whoosh
“One Nation 31.”	The orange bar slams to 31	Hit
“Labor 30.”	The red bar slams to 30	Hit

S19

> By August, a RedBridge poll found around four in ten voters rated One Nation as the best party on immigration. Labor and the Liberals sat below 20% each. On this one issue, Pauline Hanson was no longer on the fringe. She was in front. And that’s when the government started moving.

🎙️ **EVIDENCE → WEIGHT**, 140 then 125 wpm. ⏸️ 0.4 s before “She was in front.” ⏸️ 1.0 s after the final line.

Visual track

1. ⏳ An issue chart from RedBridge (late July–Aug 2026): One Nation about 40, Labor 17, Liberal 16. Poll card E09. **FACT**
2. ⏳ Kinetic: “FRINGE” is struck through in red, and “IN FRONT” types beneath it.
3. ⏳ A **red track appears below the orange track**, empty, with a blinking cursor at JUN 2026.

⚡ **Animation cues**

VO cue	Animation	Sound
“four in ten”	4 of 10 tiles fill orange	Four ticks
“below 20%”	Red and blue bars sit low; a dashed 20% line draws	Low thud
“no longer on the fringe”	“FRINGE” is struck through	Marker

		strike
“in front”	“IN FRONT” types in	Type thuds
“the government started moving”	The red track draws in and the cursor blinks	Low pulse

---

CHAPTER 4: The pattern

S20

> Here’s the timeline. Watch the dates. In June 2026, on the day One Nation tops Newspoll, Anthony Albanese commits to cutting net migration to 225,000.

🎙️ **EVIDENCE**, 135 wpm. “Watch the dates.” is punchy, followed by a 0.3 s beat.

Visual track

1. ⏳ The full pattern board: orange, red and blue tracks with a date ruler (JUN–OCT 2026). The camera parks at June.
2. ⏳ An orange node “JUN 2026 · Newspoll: One Nation 31” and a red node “SAME DAY · 225,000 pledge”. The gap label reads **”+0 DAYS”**. **FACT**
3. 📸 PIN the Albanese photo onto the red node.

⚡ **Animation cues**

VO cue	Animation	Sound
“Watch the dates”	The date ruler ticks across the screen	Clock ticks
“tops Newspoll”	The orange node pulses	Pulse
“225,000”	The red node stamps in; the thread links the nodes; “+0 DAYS” pops	Stamp + snap + pop

---

S21

> In July, Home Affairs Minister Tony Burke pauses or slows the processing of working holiday visas. A new ministerial direction sends skilled workers applying from overseas to

> the back of the queue. For some, waits stretch from days to more than a year.

🎙️ **EVIDENCE**, 140 wpm.

Visual track

1. ⏳ A red node “JUL 2026 · Working holiday visas paused/slowed · Ministerial Direction 119”. **FACT** (ABC)
2. 📸 STACK:
   - `IMG_burke` with the lower-third “Tony Burke · Home Affairs Minister”;
   - `BR_STOCK_passport_desk_generic` ;
   - `BR_STOCK_orchard_ladders` .
3. ⏳ Queue animation: a ticket labelled “SKILLED VISA · APPLIED FROM OVERSEAS” slides from the front of a row of tickets to the back. A wait-time bar stretches from “DAYS” to “1 YEAR+”.

⚡ **Animation cues**

VO cue	Animation	Sound
“pauses or slows”	A “PAUSED” toggle flips on a backpack icon	Switch click
“back of the queue”	The ticket slides to the end of the line	Paper slide
“more than a year”	The wait bar stretches long	Stretch creak

S22

> In August, Tony Burke is due to give a major speech on migration. It’s abruptly postponed, amid reports of disagreements inside cabinet.

🎙️ **STORY**, 145 wpm.

Visual track

1. 🎬 `BR_STOCK_empty_lectern_microphone` (2 s).
2. ⏳ A red node “AUG 2026 · Migration speech postponed”. A grey “POSTPONED” stamp. **FACT**
3. 🧾 Card E10: “Reports of disagreement between ministers”. **FACT** (as reported by the

ABC)

⚡ **Animation cues**

VO cue	Animation	Sound
“major speech”	Lectern lights fade up	Hum
“abruptly postponed”	The lights cut; the stamp lands	Light-switch clunk + stamp
“disagreements”	Two small chat bubbles clash on the card	Soft clash

---

S23

> On 14 September, Pauline Hanson announces One Nation’s plan: more than 750,000 temporary visas cut over three years, and net negative migration. That means more people leaving Australia than arriving.

🎙️ **EVIDENCE**, 140 wpm. Explain “net negative” clearly and slowly.

Visual track

1. ⏳ An orange node “14 SEP 2026 · One Nation plan”. **CLAIM** (policy)
2. 📸 DROP `IMG_hanson_cc0` , then STACK `IMG_joyce` (**REUSE**) with the lower-third “Barnaby Joyce · One Nation MP”.
3. ⏳ The explainer equation from S07 returns. The departures plane grows bigger than the arrivals plane, and the result flips below zero: “NET NEGATIVE”.
4. 🧾 Card E11: “750,000+ temporary visas · 3 years · net negative, then 130,000 ceiling”. **CLAIM**

⚡ **Animation cues**

VO cue	Animation	Sound
“750,000”	Number roll; visa icons peel off a stack	Roll + paper flutter
“net negative”	The result needle swings below zero	Needle swing
“more people leaving”	The departures plane enlarges	Jet swell

S24

> On 17 September, three days later, Tony Burke finally gives his speech. Tighter rules for temporary visas. A ballot for working holiday visas. And, according to the ABC, international students would effectively lose the ability to bring their families.

🎙️ **EVIDENCE**, 140 wpm. List items get a 0.2 s gap. Lift on “three days later”.

Visual track

1. ⏳ A red node “17 SEP 2026 · Burke migration speech”. The thread links it to the 14 SEP orange node, and the gap label **”+3 DAYS”** pulses. **FACT**
2. 📸 PAN `IMG_burke` . This is a FREE SWAP for the National Press Club speech: no NPC footage.
3. 📽️ Optional: `FT04_burke_qt_sep2026` 🟢 (ParlView, Question Time, 16–17 Sep 2026, Burke answering on migration), 3 s, played plainly.
4. 🧾 Card E12, a measures checklist (**FACT**, as reported): tighter temporary-visa rules · working holiday ballot · student family visas (ABC report).

⚡ **Animation cues**

VO cue	Animation	Sound
“three days later”	“+3 DAYS” flashes twice	Double pop
“Tighter rules”	Tick 1	Tick
“A ballot”	Tick 2; a raffle drum icon spins once	Tick + spin
“bring their families”	Tick 3; a family-of-suitcases icon greys out	Tick + soft fade

---

S25

> Then on 6 October, Opposition Leader Angus Taylor announces the Coalition’s plan: net migration of 100,000 a year for two years, which he calls the largest cut in Australian history. Future migration would be linked to the number of homes built.

🎙️ **EVIDENCE**, 140 wpm.

Visual track

1. ⏳ A blue node “6 OCT 2026 · Coalition plan”. The thread links it from the 14 SEP orange node, with the gap label **”+22 DAYS”**. **CLAIM** (policy)
2. 📸 DROP `IMG_taylor` with the lower-third “Angus Taylor · Opposition Leader”.
3. ⏳ A blue bar shows 100,000 for two years, then 130,000, then 160,000. **CLAIM**
4. ⏳ A house icon chained to a plane icon: “linked to homes built”.

⚡ **Animation cues**

VO cue	Animation	Sound
“100,000”	The blue bar builds with a number roll	Roll
“largest cut in Australian history”	A “CLAIM” tag snaps onto the phrase	Tag snap
“linked to the number of homes built”	A chain locks the house to the plane	Chain clink

---

S26

> And here’s the strangest part. One Nation’s Barnaby Joyce publicly accused the Coalition of adopting One Nation’s policy. So now even the copying is being fought over.

🎙️ **STORY**, 145 wpm. A slight, dry smile in the voice on the last line, never mocking.

Visual track

1. 📸 SPLIT `IMG_joyce` and `IMG_taylor`.
2. ⏳ A thread from the orange track to the blue node, labelled “CLAIM: Joyce says the Coalition adopted One Nation’s policy”. Orange outline. **CLAIM**
3. ⏳ Kinetic: “WHO’S COPYING WHO?” The three tracks’ threads tangle for a second.

⚡ **Animation cues**

VO cue	Animation	Sound
“strangest part”	The camera tilts 3°	Low “hmm” tone
“accused the Coalition”	The claim thread pulls taut	Thread creak

“even the copying is being fought over”	The threads tangle, then untangle	Rope rustle

---

S27

> Put the dates side by side and the pattern is hard to miss. Every time One Nation moved, the major parties seemed to move soon after. But a pattern isn’t proof. And Labor has a very different version of this story.

🎙️ **STORY → WEIGHT**, 140 then 120 wpm. ⏸️ 0.5 s before “But a pattern isn’t proof.” The last line is low, a cliffhanger.

Visual track

1. ⏳ The camera pulls back to the whole board. Every orange node lights, with threads to the red and blue nodes after it and the gap labels glowing.
2. ⏳ A grey dashed stamp: **“PATTERN ≠ PROOF”**. **ANALYSIS**
3. ⏳ The board shudders and slides right, revealing a hidden grey section on the far left with “2023” faintly visible.

⚡ Animation cues

VO cue	Animation	Sound
“side by side”	All the gap labels pop in sequence	Rapid pops
“seemed to move soon after”	The threads glow orange → red	Rising tone
“a pattern isn’t proof”	The stamp lands	Heavy stamp
“a very different version”	The board slides, uncovering “2023”	Paper drag

▶ **MID-ROLL AD BREAK 2** (0.5 s of room tone, music out)

CHAPTER 5: The case against “copying”

S28

> Labor’s argument starts in December 2023, long before One Nation’s surge. That month, Anthony Albanese said migration needed to come back to a “sustainable level.” His government released a migration strategy promising to bring numbers down from the

> post-COVID peak.

🎙️ **EVIDENCE**, 140 wpm. Same warmth and authority as Chapter 4, with equal weight.

Visual track

1. ⏳ The camera dives into the revealed **grey track**. A node "DEC 2023 · Migration Strategy". **FACT**
2. 📸 STACK `IMG_albanese_dfat` and `IMG_oneil` (lower-third "Clare O'Neil · Home Affairs Minister, 2023").
3. 🧾 Quote card E13: "sustainable level". Albanese, Dec 2023. **FACT** (his words)
4. ⏳ A ruler measures the distance from DEC 2023 to NOV 2025 (the first orange node): "23 MONTHS EARLIER".

⚡ **Animation cues**

VO cue	Animation	Sound
"December 2023"	The split-flap board rolls to DEC 2023	Rattle
"long before"	The ruler extends to the first orange node	Tape-measure zip
"sustainable level"	Highlighter swipe	Swipe
"post-COVID peak"	A small peak icon appears with a downward arrow	Soft descending tone

---

S29

> And the numbers did come down. Net overseas migration fell from more than half a million in 2023 to about 301,000 in 2025, a drop of roughly 45%. Most of that fall happened before One Nation was leading anything.

🎙️ **EVIDENCE**, 135 wpm. Stress "before".

Visual track

1. ⏳ The S08 line chart returns (**same asset**). The line falls from 530,620 to 301,000, and a "≈ −45%" label pops. **FACT**
2. ⏳ The One Nation polling line fades in on a second axis, flat until late 2025 and rising after. A shaded band marks "MOST OF THE FALL". **ANALYSIS** (timing comparison, our

chart)

3. 🧾 Card E14 (ABS figures, as reported by AAP). **FACT**

⚡ **Animation cues**

VO cue	Animation	Sound
“did come down”	The line descends	Descending whoosh
“roughly 45%”	The percentage label pops	Pop
“before One Nation was leading”	The shaded band sweeps over the 2024 section	Sweep

---

S30

> The 225,000 figure wasn’t invented in June either. It first appeared as a forecast in the federal budget. Labor then turned it into a target. And the gap between the parties is still enormous. Labor wants net migration of 225,000. The Coalition wants 100,000. One Nation wants net negative migration for three years.

🎙️ **EVIDENCE**, 140 wpm. The three party lines are rhythmic, with 0.3 s between them.

Visual track

1. 🧾 Card E15: the budget forecast. ZOOM in on the word “forecast”, which then flips to “TARGET” with a stamp. **FACT** (ABC)
2. ⏳ **Three-plan comparison** in an identical bar style: Labor 225,000 (red, by mid-2028), Coalition 100,000 (blue, first two years), One Nation below zero (orange, dipping under the axis, three years). Each bar is **CLAIM** (policy).

⚡ **Animation cues**

VO cue	Animation	Sound
“forecast”	Document zoom	Page turn
“a target”	The “TARGET” stamp	Stamp
“225,000”	The red bar rises	Roll
“100,000”	The blue bar rises shorter	Roll

“net negative”	The orange bar dips below the axis	Downward swoop

---

S31

> Labor ministers have also attacked Hanson’s plan head on. Environment Minister Murray Watt said it would “probably drive the Australian economy into recession.” Labor’s Patrick Gorman mocked it, saying a policy thirty years in the making had collapsed within half an hour. And at the September speech, Tony Burke rejected what he called “absurd claims” that Australia is a nation of mass migration.

🎙️ **EVIDENCE**, 140 wpm. All quotes are read neutrally.

> **Script change from the approved draft:** the Gorman line is now paraphrased rather than quoted. This keeps the on-screen wording safe, and it avoids naming his ministerial title, which wasn’t verified.

Visual track

1. 📸 DROP `IMG_watt` . Quote card E16. **FACT** (his words)
2. 📸 DROP `IMG_gorman` , or a name card if there’s no free photo. Paraphrase card E17 (no quotation marks). **CLAIM**
3. 📸 PAN `IMG_burke` . Quote card E18: “absurd claims”. **FACT** (his words)

⚡ **Animation cues**

VO cue	Animation	Sound
“head on”	The three cards fan out like a hand of cards	Card fan
“recession”	A small chart icon dips red	Dip tone
“within half an hour”	A clock icon spins 30 minutes	Clock whirr
“absurd claims”	Highlighter swipe	Swipe

S32

> So is Labor copying Hanson? Or is it simply finishing a job it started three years ago, and getting louder about it because voters are watching? But whoever is leading this race, someone is going to pay for it.

🎙️ **QUESTION → WEIGHT**, 130 then 120 wpm. ⏸️ 0.5 s before “But whoever”.

Visual track

1. ⏳ The board toggles between two overlays:
   - “COPYING?”: the orange → red threads glow.
   - “FINISHING THE JOB?”: the grey 2023 track glows and flows into the red track.
2. ⏳ A receipt prints from the bottom of the frame: “COST: ?”

⚡ **Animation cues**

VO cue	Animation	Sound
“copying”	The orange → red overlay lights	Tone A
“finishing a job”	The grey → red overlay lights	Tone B
“voters are watching”	Both overlays hold together	Chord
“pay for it”	The receipt prints	Receipt printer

CHAPTER 6: Who pays?

S33

> Every migration cut lands on someone. Universities are among the first. Universities Australia’s chief executive Luke Sheehy accused all three parties of joining a political race to the bottom on international students, one of Australia’s biggest export industries.

🎙️ **STORY**, 140 wpm.

Visual track

1. ⏳ The receipt from S32 unrolls into a list header: “WHO PAYS?”
2. 🎬 `BR_STOCK_university_campus_aerial` (2 s).
3. 📸 STACK `BR_STOCK_graduation_caps_air` and `BR_STOCK_lecture_hall_empty`.
4. 🧾 Card E19: Universities Australia (Sept 2026), a “race to the bottom” on international students. **CLAIM**
5. ⏳ A small export icon (ship + graduation cap) with the label “International education: a major export”. **FACT** (verify the figure on publish day)

⚡ **Animation cues**

VO cue	Animation	Sound
“lands on someone”	Line 1 prints on the receipt: “UNIVERSITIES”	Print tick
“race to the bottom”	Three party bars race downward	Descending race
“export industries”	The export icon pops	Pop

S34

> Hospitality is next. Accommodation Australia says there are more than 40,000 unfilled hospitality jobs nationwide, and warns that cutting migrant workers will make the shortage worse. Then there’s regional Australia, where backpackers pick fruit, pour beers and fill motel rooms. When Labor slowed working holiday visas, independent MP Helen Haines raised the damage to the regions in Parliament.

🎙️ **STORY**, 145 wpm.

Visual track

1. ⏳ Receipt line 2: “HOSPITALITY”.
2. 🎬 `BR_AI_cafe_empty_morning` (2 s): chairs up on tables, coffee machine idle.
3. 🧾 Card E20: “40,000+ hospitality vacancies”. **CLAIM** (Accommodation Australia, 12 Aug 2026)
4. ⏳ Receipt line 3: “REGIONS”. A map of regional Australia with orchard, glass and motel icons dimming.
5. 📸 STACK `BR_STOCK_orchard_ladders` , `BR_STOCK_country_pub_exterior` and `BR_STOCK_motel_sign_dusk` .
6. 📽️ `FT05_haines_qt_sep2026` 🟢 (ParlView, House Question Time, 16 Sep 2026, Helen Haines asking about working holiday visas), 4 s, played plainly. FREE SWAP: `IMG_haines` plus a paraphrase card.

⚡ **Animation cues**

VO cue	Animation	Sound
“40,000”	Number roll	Roll

“pick fruit” / “pour beers” / “fill motel rooms”	Each icon lights, then dims	Three soft pings
“in Parliament”	The ParlView clip slides in	Whoosh

S35

> And here’s the twist in that story. Pauline Hanson also attacked Labor’s slowdown, accusing the government of “starving” regional Australia of workers and tourists. So the politician most famous for wanting less migration criticised the government for cutting the wrong kind.

🎙️ **STORY**, 140 wpm. Neutral, lightly intrigued. Not mocking.

Visual track

1. 📸 DROP `IMG_hanson_cc0` onto the regional map.
2. 🧾 Card E21: Hanson statement, 17 Sep 2026 (as reported by the ABC). The word “starving” is in quotation marks; the rest is paraphrased. **CLAIM**
3. ⏳ Two arrows, “LESS MIGRATION” and “NOT THESE CUTS”, twist together into a knot on the red thread.

⚡ **Animation cues**

VO cue	Animation	Sound
“twist”	The camera rolls 5°	Tonal twist
“starving”	Highlighter swipe	Swipe
“the wrong kind”	The two arrows knot together	Rope tighten

S36

> Meanwhile, migration experts writing in The Conversation argue that none of the three parties’ plans is properly based on evidence. Every party is chasing one headline number, net overseas migration, without modelling what happens to housing, wages or the economy once it moves. So if the numbers aren’t driving this race, what is? The answer might be in the polls.

🎙️ **EVIDENCE → QUESTION**, 140 then 125 wpm. ⏸️ 0.6 s before “The answer might be in

the polls.” The last line is low, a cliffhanger.

Visual track

1. 🧾 Card E22: The Conversation, Oct 2026. None of the three plans is properly based on evidence. **ANALYSIS**
2. ⏳ Three party arrows point at one big gauge, “NET OVERSEAS MIGRATION”. Three smaller gauges (“HOUSING”, “WAGES”, “ECONOMY”) stay grey, stamped “NO MODELLING”.
3. ⏳ The padlocked chart from S05 slides back in and rattles hard.

⚡ **Animation cues**

VO cue	Animation	Sound
“one headline number”	The big gauge needle swings	Needle
“housing, wages or the economy”	The three small gauges stamp grey	Three stamps
“what is?”	The padlock rattles	Chain rattle
“in the polls”	The padlock glints	Shimmer + bass

▶ **MID-ROLL AD BREAK 3** (0.5 s of room tone, music out)

CHAPTER 7: The twist

S37

> Remember that pattern nobody’s talking about? Here it is. In mid-September, before Labor’s crackdown, Newspoll had One Nation on 30% and Labor on 27%. Three weeks after Tony Burke’s speech, the next Newspoll came out. Labor had risen to 29%. One Nation had dropped to 28%. The Coalition sat on 20%. For the first time on record, all three parties were in the twenties.

🎙️ **HOOK → EVIDENCE**, 150 then 140 wpm. “Here it is.” is followed by a 0.3 s beat. The numbers are crisp.

Visual track

1. ⏳ **The padlock breaks** and the blurred chart snaps into focus.
2. ⏳ A poll-lines chart:

    - Newspoll 14–17 Sep 2026: One Nation 30, Labor 27, Coalition 19.
    - Newspoll 5–8 Oct 2026 (n = 1,241): Labor 29, One Nation 28, Coalition 20.
    - A vertical marker “17 SEP · Burke speech”.
    - **The orange and red lines cross.** Poll card E23. **FACT**
3. ⏳ A stamp: “ALL THREE IN THE 20s · FIRST TIME ON RECORD”. **FACT**

⚡ **Animation cues**

VO cue	Animation	Sound
“Here it is.”	The padlock shatters	Glass/metal break + bass

“out-manoeuvring her?”	The title glows yellow	Shimmer
“Tell us in the comments.”	The comment bubble pops	Pop

PART 6: Grok voiceover (voice: Atlas)

How to generate

- Generate one segment at a time, with identical voice settings for every segment.
- Numbers are written as words so they’re read correctly.
- Tags in square or angle brackets are delivery directions, never spoken.
- The pace and pauses are finalised in the mix (3.11).

Pronunciation to check: Albanese (al-buh-NEE-zee), Ipswich, Farrer, Burke, Haines, Sheehy, Duniam, Gorman, DemosAU (DEM-oss A-U), RedBridge.

S01 On a Monday in June, twenty twenty-six, a Newspoll landed in Canberra like a bomb. [pause] Pauline Hanson’s One Nation was on thirty-one percent of the primary vote. Anthony Albanese’s Labor government was on thirty percent.

S02 That same day, the Prime Minister stood in front of reporters and made a promise. Net overseas migration would come down to two hundred and twenty-five thousand. “We think that is the right number,” he said. [pause] <slow>Coincidence?</slow> [short pause]

Maybe.

S03 Three months later, Pauline Hanson announced a plan to cut seven hundred and fifty thousand temporary visas. Three days after that, Labor unveiled its own migration crackdown.

S04 So is Anthony Albanese copying Pauline Hanson? [pause] Or is something bigger happening in Australia, something both of them are reacting to?

S05 We're not going to tell you what to think. We're going to lay out the dates, the numbers and the quotes, in order. And at the end, there's one pattern in the polls that almost nobody is talking about. But first, the question everyone is fighting over. [pause] <slow>Is Australia actually full?</slow>

S06 Australia's population now stands at about twenty-seven point nine million people. In the twelve months to March twenty twenty-six, the country grew by three hundred and ninety-two thousand, seven hundred people. Around three in every four of them came from overseas.

S07 Net overseas migration, the number of people arriving to live in Australia minus the number leaving, was two hundred and ninety-two thousand, one hundred over that year. That's roughly eight hundred people <slow>every single day.</slow>

S08 And that's the low number. In twenty twenty-three, after the borders reopened from COVID, net migration passed half a million, the highest on record.

S09 Now, by land, Australia is one of the emptiest countries on Earth, with about three people for every square kilometre. So when people ask "Is Australia full?", they're rarely talking about land. They're talking about homes. Rents. Hospital waiting lists. Traffic on the M-one.

S10 The Coalition's Andrew Bragg points out that Australia completes only around one hundred and seventy thousand new homes a year, far fewer than the number of people arriving. Supporters of migration answer that migrants build many of those homes, staff the hospitals and pay the taxes that fund them.

S11 Both sides are using the same numbers. They just read them differently. [pause] And for thirty years, one politician has been reading them the same way.

S12 <slow>In September, nineteen ninety-six, a newly elected MP from Ipswich named Pauline Hanson gave her first speech to Parliament. [pause] She warned that Australia was in danger of being "swamped by Asians."</slow> [long pause]

S13 The speech made her famous, and in much of the country, it made her untouchable. Both major parties preferenced against her. Commentators called her views racist. For two

decades, being seen near Hanson was treated as political poison.

S14 But she never stopped talking about migration. In twenty sixteen, she returned to the Senate warning about Muslims. In twenty eighteen, she called for migration to be capped at seventy-five thousand a year. By twenty twenty-five, her target was one hundred and thirty thousand.

S15 Then came the May twenty twenty-five federal election. The Coalition ran on cutting migration, and lost in a landslide. Labor won ninety-four seats. One Nation won about six percent of the vote, and not one seat in the House of Representatives. On that night, Pauline Hanson looked like a story from the past. [pause] <slow>What happened next surprised almost everyone in Canberra.</slow>

S16 By November twenty twenty-five, just six months after that election, polls showed something new. For the first time, more voters named One Nation as the party best able to handle immigration than named Labor or the Coalition.

S17 In January twenty twenty-six, One Nation drew level with the Coalition at twenty-three percent in a national poll. In March, One Nation won almost twenty-three percent of the vote at the South Australian state election, and took four lower-house seats.

S18 In May, One Nation's David Farley won the Farrer by-election, becoming the first One Nation candidate ever elected to the House of Representatives. And in June came that Newspoll. [short pause] One Nation thirty-one. [short pause] Labor thirty.

S19 By August, a RedBridge poll found around four in ten voters rated One Nation as the best party on immigration. Labor and the Liberals sat below twenty percent each. On this one issue, Pauline Hanson was no longer on the fringe. [short pause] She was in front. [pause] <slow>And that's when the government started moving.</slow>

S20 Here's the timeline. [short pause] Watch the dates. In June twenty twenty-six, on the day One Nation tops Newspoll, Anthony Albanese commits to cutting net migration to two hundred and twenty-five thousand.

S21 In July, Home Affairs Minister Tony Burke pauses or slows the processing of working holiday visas. A new ministerial direction sends skilled workers applying from overseas to the back of the queue. For some, waits stretch from days to more than a year.

S22 In August, Tony Burke is due to give a major speech on migration. It's abruptly postponed, amid reports of disagreements inside cabinet.

S23 On the fourteenth of September, Pauline Hanson announces One Nation's plan: more than seven hundred and fifty thousand temporary visas cut over three years, and net negative migration. <slow>That means more people leaving Australia than arriving.</slow>

S24 On the seventeenth of September, three days later, Tony Burke finally gives his speech. Tighter rules for temporary visas. A ballot for working holiday visas. And, according to the A-B-C, international students would effectively lose the ability to bring their families.

S25 Then on the sixth of October, Opposition Leader Angus Taylor announces the Coalition's plan: net migration of one hundred thousand a year for two years, which he calls the largest cut in Australian history. Future migration would be linked to the number of homes built.

S26 And here's the strangest part. One Nation's Barnaby Joyce publicly accused the Coalition of adopting One Nation's policy. So now even the copying is being fought over.

S27 Put the dates side by side and the pattern is hard to miss. Every time One Nation moved, the major parties seemed to move soon after. [pause] But a pattern isn't proof. <slow>And Labor has a very different version of this story.</slow>

S28 Labor's argument starts in December twenty twenty-three, long before One Nation's surge. That month, Anthony Albanese said migration needed to come back to a "sustainable level." His government released a migration strategy promising to bring numbers down from the post-COVID peak.

S29 And the numbers did come down. Net overseas migration fell from more than half a million in twenty twenty-three to about three hundred and one thousand in twenty twenty-five, a drop of roughly forty-five percent. Most of that fall happened <slow>before</slow> One Nation was leading anything.

S30 The two hundred and twenty-five thousand figure wasn't invented in June either. It first appeared as a forecast in the federal budget. Labor then turned it into a target. And the gap between the parties is still enormous. Labor wants net migration of two hundred and twenty-five thousand. [short pause] The Coalition wants one hundred thousand. [short pause] One Nation wants net negative migration for three years.

S31 Labor ministers have also attacked Hanson's plan head on. Environment Minister Murray Watt said it would "probably drive the Australian economy into recession." Labor's Patrick Gorman mocked it, saying a policy thirty years in the making had collapsed within half an hour. And at the September speech, Tony Burke rejected what he called "absurd claims" that Australia is a nation of mass migration.

S32 So is Labor copying Hanson? Or is it simply finishing a job it started three years ago, and getting louder about it because voters are watching? [pause] <slow>But whoever is leading this race, someone is going to pay for it.</slow>

S33 Every migration cut lands on someone. Universities are among the first. Universities Australia's chief executive Luke Sheehy accused all three parties of joining a political race to the bottom on international students, one of Australia's biggest export industries.

S34 Hospitality is next. Accommodation Australia says there are more than forty thousand unfilled hospitality jobs nationwide, and warns that cutting migrant workers will make the shortage worse. Then there's regional Australia, where backpackers pick fruit, pour beers and fill motel rooms. When Labor slowed working holiday visas, independent MP Helen Haines raised the damage to the regions in Parliament.

S35 And here's the twist in that story. Pauline Hanson also attacked Labor's slowdown, accusing the government of "starving" regional Australia of workers and tourists. So the politician most famous for wanting less migration criticised the government for cutting the wrong kind.

S36 Meanwhile, migration experts writing in The Conversation argue that none of the three parties' plans is properly based on evidence. Every party is chasing one headline number, net overseas migration, without modelling what happens to housing, wages or the economy once it moves. So if the numbers aren't driving this race, what is? [pause] <slow>The answer might be in the polls.</slow>

S37 Remember that pattern nobody's talking about? [short pause] Here it is. In mid-September, before Labor's crackdown, Newspoll had One Nation on thirty percent and Labor on twenty-seven percent. Three weeks after Tony Burke's speech, the next Newspoll came out. Labor had risen to twenty-nine percent. One Nation had dropped to twenty-eight percent. The Coalition sat on twenty percent. For the first time on record, all three parties were in the twenties.

S38 Resolve and Demos A-U showed the same thing. One Nation was slipping, and Labor was recovering. That doesn't prove the crackdown caused the shift. Polls move for many reasons. <soft>But if you were a strategist inside Labor, you'd notice.</soft>

S39 And then, this week, Anthony Albanese gave a speech that seemed to point the other way. He made a passionate defence of multiculturalism. In a swipe that sounded aimed at Hanson, who has said Australia should be a monoculture, he said anyone who looks back and sees a single culture should "get themselves down to the nearest Specsavers." [pause]

S40 So in the same season, the Prime Minister has cut visas, introduced a backpacker ballot and set a lower migration target, while publicly fighting the very idea One Nation stands for. Is that copying Hanson? [pause] Or is it the opposite: taking away her issue while rejecting her argument?

S41 So let's put it all together. One Nation's rise came first, and Labor's toughest migration moves came after. That's the pattern. But Labor started cutting migration back in twenty twenty-three, its targets are still far higher than Hanson's, and Albanese is openly campaigning against her vision of Australia. That's the counter-pattern.

S42 And sitting underneath both is the question that started it all. <slow>Is Australia full?

</slow> By land, no. [short pause] By housing, many Australians feel it is. [short pause] And by politics, every major party is now promising to slow things down.

S43 <slow>Thirty years ago, Pauline Hanson was treated as the outsider of Australian politics. Today, the Prime Minister, the Opposition Leader and One Nation are all arguing about the same thing: how far migration should fall. [pause] Maybe Albanese isn't copying Hanson. [pause] Maybe Australia simply changed, and every party is chasing the same voters. [pause] Or maybe, after thirty years, Pauline Hanson is finally setting the agenda. </slow> [long pause]

S44 You've seen the evidence. Now you decide. [pause] Is Albanese copying Hanson, or out-manoeuvring her? And is Australia full? Tell us in the comments.

8.4 AI B-roll (Grok Imagine). Add the 3.10 style anchor to every prompt.

ID / file	Prompt
BR_AI_canberra_dawn_fog.mp4	Slow drone push through thick dawn fog over a quiet capital city lake, the silhouette of a large modern government building emerging, cold blue light turning gold, eerie calm.
BR_AI_outback_aerial_empty.mp4	High aerial shot over endless red Australian outback, a single dirt road to the horizon, no buildings, slow rising camera, vast emptiness, late afternoon light.
BR_AI_1990s_lounge_tv_glow.mp4	An empty 1990s suburban Australian lounge room at night, a boxy CRT television glowing and flickering on a timber cabinet, floral couch, nobody in the room, slow dolly in.
BR_AI_election_night_empty_hall.mp4	An empty function hall after an election night party, deflated balloons on the carpet, stacked chairs, a blank stage with a microphone, no signage, no logos, slow pan.

`BR_AI_cafe_empty_morning.mp4`	A small Australian café in the early morning, chairs stacked on tables, an idle espresso machine, sunlight through the front window, no people, slow push in.
`BR_AI_strategy_room_whiteboard.mp4`	An empty office at night, a whiteboard covered in unreadable marker scribbles and arrows, one desk lamp, city lights through the window, no people, slow pan.
`BR_AI_thumbnail_bg.png`	(Still image.) Cinematic YouTube thumbnail background, 16:9. A cracked dark map of Australia at the centre on a weathered wall, with a glowing red digital counter reading '800 / DAY'. Four pinned polaroid photos connected by red string: an airport arrivals board, a 'SOLD' real estate sign, construction cranes over apartments, a graduation cap. Below, a grand modern parliament building at a dramatic red-orange sunset. High contrast, moody, empty space on the left and right edges for portraits, no text except the counter, no people.

If Grok Imagine renders any readable text other than "800 / DAY", regenerate. The real Parliament House can be composited in from `BR_STOCK_parliament_house_canberra`.

Gap labels	+0 days (June) · +3 days (14→17 Sep) · +22 days (14 Sep→6 Oct)	Dates above

---

PART 10: Publish-day checks

1. **Polls:** if the 5–8 October Newspoll is no longer the latest, update S37, S38, E23–E25 and Part 9. If the new poll reverses the crossover, rewrite S37–S38 before publishing; the twist depends on it.
2. **June Newspoll date:** confirm the exact fieldwork and publication dates (expected Monday 15 June 2026) and that Albanese’s 225,000 comment came the same day. If it was a different day, change “+0 DAYS” and “That same day” (S02, S20).
3. **“This week” (S39):** change it to “in October” if publishing after about 22 October 2026. Confirm the delivered speech contains the Specsavers line exactly as quoted.
4. **Joyce accusation (S26):** confirm in a major outlet (ABC, AAP, Guardian, Nine). If it can’t be confirmed, cut S26 and close S25 with the next line of S27.
5. **The May 2025 Coalition migration policy** wording (S15) and the 2025 results (AEC tally room).
6. **The “major export” card (S33):** add the latest official international education export figure, or keep the card wording general.
7. **ParlView dates** for FT04 and FT05 (16 vs 17 Sep sittings).
8. **Licences:** every photo, clip, sound and track has its licence confirmed and its credit recorded.
9. **ParlView confirmation** in writing (**REUSE** if it covers the channel).
10. **Lawyer review** of the final cut.
11. **Comment moderation on** (“hold potentially inappropriate comments”). This topic will

attract heated comments. Pin the neutral pinned comment from Part 1.

PART 11: Disclaimer (S05 short on-screen card and the top of the description)

> This is an independent documentary made for educational and informational purposes. It is not affiliated with, endorsed by, or paid for by Anthony Albanese, the Labor Party, Pauline Hanson, One Nation, the Coalition, or any political party or candidate. Statements of fact come from official statistics, parliamentary records, official election results, published polls and reputable news reports, shown on screen and listed in the description. Quotations are presented in context with dates. Analysis is clearly labelled, and the video does not claim that any politician copied another; it presents a timeline and invites viewers to decide. Some background scenes are AI-generated reconstructions; no real person has been AI-generated or altered. If you believe anything is inaccurate, contact [your email] and we will review it promptly.
